

Maternal Magic

ONLINE EMBRYO SALE

04.05.20

sale will be held on tjbgelbviewh.com

CATTLEMEN & CATTLEWOMEN,

Welcome to our Online Maternal Magic Embryo Sale! TJB Gelbvieh is one of the only breeders in any breed that offers you the opportunity to purchase all of the embryos in our inventory. I have not listed every embryo from each mating but no mating is held back. You are given the chance to select from the embryos we depend on to build our next generation. As most of you know, I am a veterinarian and an embryologist and provide ET services throughout the Southeast. Because of this, I continue to flush only the best of our cattle and consequently have more embryos than we can utilize. Now for a very reasonable investment, you can capitalize on thirty years of intense selection based on maternal excellence.

You can capitalize on 30 years of intense selection based on maternal excellence.

We were truly blessed this past National Western Stock Show (NWSS) to have TJB Rebel Yell 804F selected as 2020 Balancer Bull Futurity winner and later named 2020 Grand Champion Balancer Bull. What a thrill in our career to have an individual bred solely for production be selected for overall excellence. Rebel Yell is a descendant from our purchase of BB 61Y in 1996 from Severtson Land and Cattle in Alberta.

You can select from the “Anissa Family” in this sale, as she has become the dominant cow family at TJB Gelbvieh. You will also have the final opportunity to select embryos from his deceased dam, 921U.

TJB Gelbvieh is only a fall calving herd. Although we have many pretty pictures, our cows are demanded to perform. We maintain a 60 day calving season with close to 75-90% of calves born in the first 25 days of the season. Any females that lack udder quality or feet and leg structure are placed in the recip herd. We make no excuses. Does that mean every individual we produce meets expectations? I wish I could say yes, but if they do not, they become recip or are culled.

Please feel free to call and visit if you have any questions. I continue to be brutally honest and will tell you anything you want to know to the best of my ability. If you have problems with our embryos, please let me know. I guarantee 50% conception rate on your purchases.

Thank you for your consideration of investment in TJB Gelbvieh genetics. We believe you will be pleased with the results!

Todd J. Bickett DVM

Online Bidding

To register, complete the quick, three-step instructions for online bidding below. If you have any difficulty or prefer we register you, contact Todd at (423) 667-3799. There will be lots listed with information, but I encourage you to have your catalog handy sale day!

It's important to understand that **the listed bid price is per embryo**. For total lot price, it's the "# of Embryos Selling" multiplied by the "Price" listed on the lot. For example: Lot 1 includes 3 embryos at a price of \$400, equaling \$1,200 for all three. Buyer is responsible for cost of shipping embryos.

ONLINE REGISTRATION

Do you have fast, reliable Internet connection? This is for you.

- Go to: tjbgelbvieh.com
- Click "Bid Online"
- Click on the blue silhouette in the upper right corner.
- Choose "Register"
- Fill out contact information: email and password
- Validate your phone number by visiting "My Account"
- Validate or Edit
- You will get a 4 digit pin texted to your phone number. If no texting, select call
- Login: Your email address and password you selected will be your log in information to begin bidding.

**BE READY FOR
"BUY NOW" SPECIALS
THROUGHOUT THE SALE.
REGISTER TO BID
FOR NOTIFICATIONS.**

ONLINE BIDDING, ONCE REGISTERED

- Prior to first bid you will need to agree to the "Terms and Conditions" of the auction.
- Once agreed, you may place your first bid by clicking the "Bid" button.
- The opening and next bid will say "Asking."
- Confirm that the item and bid amount is correct, then click "Place Bid."

SET UP OUTBID NOTIFICATIONS

We recommending setting these up! It's a fast and easy step.

- You can choose to receive outbid notifications via text message to guarantee you know if you have been outbid during the sale.
- Under "My Account" in the drop down, select "Notifications."
- There, you will make your choice to receive notifications.

PHONE BIDDING

Do you tend to have Internet connectivity issues? This is for you.

To bid over the phone, touch base with one of the Sale Day Contacts listed below at least three hours prior to the sale, ideally days before. We will set you up on the phone for you to place your bids.

 Russ Princ (423) 802-8347
 Alisa Bickett (423) 991-8597

Donor Females

TJB Gelbvieh embryos are all backed by dominant females selected for generations of maternal excellence. Many embryos offered in this sale are descendants of 3-6 generations of donor females in our program. Thus, the continued emphasis in our marketing as “Maternal Magic,” established at the very beginning of TJB Gelbvieh .

HYBRID VIGOR WITH THE MATERNAL ADVANTAGE

TJB Gelbvieh is a family-owned and operated farm with a focus on superior genetics and an emphasis on customer satisfaction. We strive diligently to produce elite bulls and females that will increase profitability for the commercial cattle industry and seedstock producers. Our entire program evolves around the female. We believe as a breed we truly are the most maternal of all Continental breeds today. Stacking dominant females in the pedigrees for multiple generations provides us with the consistency we think necessary to be genetic providers not genetic multipliers. TJB Gelbvieh has focused on cow families in a structured breeding program for thirty years. Our herd emphasis has been fertility and longevity generated from a moderate framed, deep-bodied female that stems from a superior individual.

50% CONCEPTION RATE GUARANTEED

TJB *Anissa* 921U - ET

921U has been a rock star for many years. The influence her and her Anissa Family have on TJB Gelbvieh is limitless. This year she produced the most unique bull in our 30 plus years of breeding Gelbvieh. TJB Rebel Yell 804F won the Breeder's Choice Balancer Bull Futurity as voted by the members which was truly an honor. He then proceeded to be named National Champion Balancer Bull. This is the first time a futurity bull was named NWSS National Champion. Her sons and daughters have anchored the program as you can see from her pictures. We are anxiously looking forward to his first calves in September!

Congratulations to Lost River Livestock for their recent sale success from the 921U/Ditka embryos they purchased in a previous sale. They had three bulls demand \$6000, \$9275, and \$3000. Numerous other reports of their 921U progeny from purchased embryos has been very positive.

These will be the last embryos ever offered from this breed stalwart. Maybe you can create another "Rebel Yell"!

TJB *Anissa* 588C

588C is the 6th generation donor descending from 61Y. What an amazing lineage she possesses. Her performance on her first two natural calves is 109 WW ratio and 110 YW ratio. She also weaned both calves at 60% of her body weight which is no easy task. We believe these Rebel Yell calves will prove special. We have two from this mating due in the fall.

WEATHER PERMITTING, DONOR PHOTO COMING SOON!

TJB *Anissa* 579C

We believe this tremendous TJB Big Show daughter of 921U could be the replacement for 921U. Her ratios of 2@94 BW, 2 @ 108 WW, and 2@ 107 YW prove she gets her job done all while looking good at it! Her first calf was a heifer and was high selling bred heifer going to Dan Warner and Chris Davison for \$4200. Her bull calf by Dalhart sold for \$3900 to Steve Bayne. She now has a very nice Copperfield heifer by side.

Jump in on the ground floor with us and the potential of this beautiful female. You won't be disappointed.

This mating combines 579C with the best of genetics from Taubenheim Gelbvieh. We were impressed by the Infinity calves when we visited and chose to use him in our matings this year. Think this mating will please the most discriminating breeders.

NATIONAL WESTERN® *Stock Show*

We were humbled and grateful by the successes our team experienced at The National Western Stock Show in Denver, CO this year. TJB Rebel Yell 804F walked away the Grand Champion Balancer Bull and Balancer Bull Futurity Champion! To our knowledge, it was the first time that a Futurity Champion was also named show champion. We were also fortunate to own a piece of the Reserve Champion Balancer Bull, XXB Battle Cry 116E. The proudest accomplishment as a breeder is to be recognized by your fellow breeders and the show judge to have produced a superior individual. Rebel Yell is the culmination of a strict breeding program for 30+ years. It is our belief that his true impact will be realized throughout his progeny.

We could not have achieved this success without the help of so many wonderful people. We're so pleased to recognize and thank Tom Murphy for his hard work and confidence in our program, and most importantly, his friendship. The dedication and effort by our Ranch manager Russ Princ is also unprecedented.

Again, we want to thank all of our friends, family, and fellow breeders for the support and kind words spoken during and since NWSS. Breeding Gelbvieh cattle is our true passion, and this show has been humbling and rewarding for our many years dedicated to our breeding program.

PHOTO CREDITS | SHOWTIMES & AMERICAN GELBVIEH ASSOCIATION

TJB *Anissa* 495B

495B is one of our first Sandhills females produced. We quickly decided that Sandhills 0065X was a perfect compliment to our genetic base. He seemed to click with most every mating. The sisters to 495B, 4102C and 4104C have been very high quality females for us. 495B is super moderate and very complete with a beautiful udder. Although not the most prolific embryo producer, she is an important individual for us. She is HP/HP as a bonus.

These embryos will be BA50 and heterozygous black. They will also be linebred Vickie Vail and Sandhills. 4120C has done phenomenal work here. He sired the \$20,000 TJB Dominic along with a few really nice females although not used extensively.

RIGHT COMBINATION | SIRE OF LOTS 12, 13, 18, & 19

DDGR 155Z

155Z is the dam of TJB Dominic 844F. Dominic sold last fall to Turner Farms for \$20,000 and was then leased to ST Genetics as the first Gelbvieh bull in their catalog. 155Z is the only Gelbvieh or Balancer female in this offering not carrying a TJB prefix and backed by many generations of TJB genetics. We saw this female in the pasture at Diamond D Gelbvieh on a visit with Dennis Gustin. She had the misfortune of slipping a pregnancy and being bred out of season. I really liked her and subsequently she moved to Chickamauga. She had raised two high selling bulls for Dennis with her first two calves. I found it very ironic, however, that upon investigation she traced back to many of our original donors including 108N(Kummerfeld), Lady Granite 432S (two times), and Wilma(Beartooth). I would like to tell you that I knew she could produce a \$20,000 bull for us at the time, but I am thrilled she did!

TJB *Vanessa* 914U

914U has been a standout donor for us. Her best mating to this date has been the Sandhills 0065X. You can see the progeny from that mating continues to impact our program. As this great donor nears the end of her productive career, look for her daughters to carry her legacy forward. She is a Lookout daughter out of a Vickie Vail/Gizmo female sired by Masterpiece. This pedigree has been well represented in this herd.

The sky's the limit with these embryos as far as I am concerned. This will be one of our first flushes expected this fall and I am pumped. 914U can produce great ones and these embryos combining the Vickie Vail family with the Anissas could be a home run. As you can see from her progeny, she is not scared to make a great individual.

The successful mating of 914U to Sandhills produced 4101C, 4103C, and 4120C. Logic to me would lead me to believe I needed to use a Sandhills son so we chose DLW Sand Trap. He being a 0065X son out of one of the highest revenue generating females in the breed, DLW Matron 802U, just made sense. We have a set of these on the ground in Kentucky now and I expect greatness from them.

Here is the most proven of matings offered. We have removed the guesswork from these and you can reap the reward. These are "money" and could easily make your next herd sire or donor female. Just take a look at full sibs pictured (4101C, 4103C, and 4120C).

4103C | FULL SIB TO LOT 17

TJB *Vanessa* 4101C

4101C is one of the Sandhills daughters of 914U. She is a beautiful cherry red female with a flawless phenotype. She is one of the reasons we are so high on the Sandhills matings. This young donor has started her career very well in production and these matings offered are exciting. If you love red females like we do, give these extra consideration.

This mating will be linebred 914U. We have always believed in the value of linebreeding for consistency but have struggled with finding the right individuals. The two animals in this mating are certainly worthy of this plan. Create your first Dominic progeny from some of our best cows. They should be stout made, maternal machines.

DOMINIC | RUSTY VAIL DAUGHTER

TJB *Blackbird* 410B

410B is an amazingly powerful, but beautifully feminine female. It is understandable when you look in her pedigree and realize the number of dominant, breed leading females in her background. From the Angus side, you have 1905 and 2429 (EXT's dam). On the Gelbvieh side there are 61Y, 2001E, Vickie Vail, and 187R (Polled Summit's dam). This female produced Buddy Boy bulls selling in 2018 for \$9600 (733E to Bud Cronan) and 701E selling for \$4200 to BJR Summerford in Alabama. We expect great things from the matings offered as we have put some of all of these in for fall calves.

In search of red PB bulls to use last year we chose Next Step. A proven Judd Ranch bull that began to make his mark in our breed should be very complimentary to this powerful donor.

TJB *Blackcap* 130X

I believe that I have failed in my marketing efforts of this stout made Masterpiece daughter as well as her full sister, 128X. Both cows have been equally as impressive with good cattle every year. We chose to identify Angus cows that would work with our time tested TJB Masterpiece. This cow has accomplished the task. There are two females in the keeper pen this year. Although this family is not one of our most recognized, don't pass on a chance to advance your program with the quality of this mating. Her Vickram daughter, 558C is one of the up and coming next generation donors for us.

You will notice (I hope) that we don't use very many bulls in our mating scheme and quite honestly not always the best known and certainly not the best EPD choices available. We try to find sires from proven families that we feel add value to our cattle from a phenotypic standpoint. Make no mistake, we put stringent criteria on our breeding herd. We expect to maintain a 60 day calving season (and have only 1 calving season) and the cattle must wean an acceptable product and do it with good feet and good udders. Are we sometimes disappointed in our next potential great female? You bet we are but we don't try to make our disappointments into your next sale purchase. They become recipes here. We think Infinity will be a positive addition to our female base.

Rusty is a red Vickram son out of famed TJB donor 912U. He is also a brother to TJB Vickram who was high selling bull for \$15000 to Taubenheim Gelbvieh. This mating also produced the high selling bull in 2017 sale for \$6500 to Hadden Ranch in 2017.

WEATHER PERMITTING, DONOR PHOTO COMING SOON!

TCC *Rita* 018

Welcome to a new donor for TJB Gelbvieh! If weather will cooperate, she will be pictured before this sale. She is a tremendous Angus donor sired by SAV Resource out of a Bismarck daughter. She traces back to GAR Scotch Cap 199. I have flushed this cow for our great friends, David Craig and family, for three years, and I finally had to get some of her. Great udder, great feet, big middled, and sound in a thick and moderate package. Just the way we like them. I don't typically make many BA25, but I had to mate this cow to Rebel Yell. I do have three of these coming next fall, and I can't wait.

TCC RITA 018

Unbelievable potential in this mating. The complementarity of Angus and Gelbvieh will be at it's very best. Buy these with extreme optimism!

REBEL YELL | SIRE OF LOT 32

Our Story

TJB Gelbvieh began in 1988 in Chickamauga, GA. Dr. Bickett had the opportunity in his large animal veterinary practice to experience Gelbvieh cattle. The initial attraction to this great breed was their performance and disposition, as well as their superior milking ability. Dr. Bickett then began his search for elite Gelbvieh genetics to utilize in his ET program. Our continued search for dominant donor females led us to Beartooth Ranch in 1992. The real breakthrough in the direction of the TJB program came through the purchase of FLK Hochger 108N. She proved to be the first real impact female in the program. The future purchases of Vickie Vail, Vickie V, Lady Granite 432S, Lady Granite 2001E, and Lady Granite 2079L formed the base of females still working today. The program today is still based on the same philosophy to identify and utilize proven cow families.

TJB Gelbvieh is a family owned and operated farm with a focus on superior genetics and an emphasis on customer satisfaction. TJB is proud to be involved in the beef industry and the Gelbvieh breed in particular. Gelbvieh cattle will play a role in the future of the beef industry and TJB genetics will be a factor in that development.

Meet the Team

(1) Todd, Alisa, Kelsie and Katelyn Bickett at the Wilson Wedding

(2) Kelsie and Bo became engaged following the Bull Sale in 2018 and were married on June 29th of 2019 in Lexington, KY. They're now living in Del Rio, TX for Bo's Air Force Pilot Training Program, where Kelsie works remotely in Digital Marketing & Communications.

(3) Katelyn is a senior at The University of Georgia studying Agricultural Communications. She spent the summer of 2019 in D.C. working as an Agricultural Fellow for Congressman Buddy Carter. This year, she will be serving as a College of Ag Ambassador and working for Georgia Extension all while enjoying the vast social scene of The Classic City! Upon graduation, she will be returning to D.C. for work.

(4) Russ and Pam Princ, *Ranch Manager* | Russ came to us with twenty years experience in ranch management and bull stud management. He also manages the Donor Facility for Bickett Genetics. We are thrilled to have him and Pam on our team!

(5) Javier Macedo and Family, *ET Technician* | Javi graduated from Vet School in Mexico and met Rebecca working at a feedlot in Yuma, CO. He assists on the farm as needed along with his ET responsibilities.

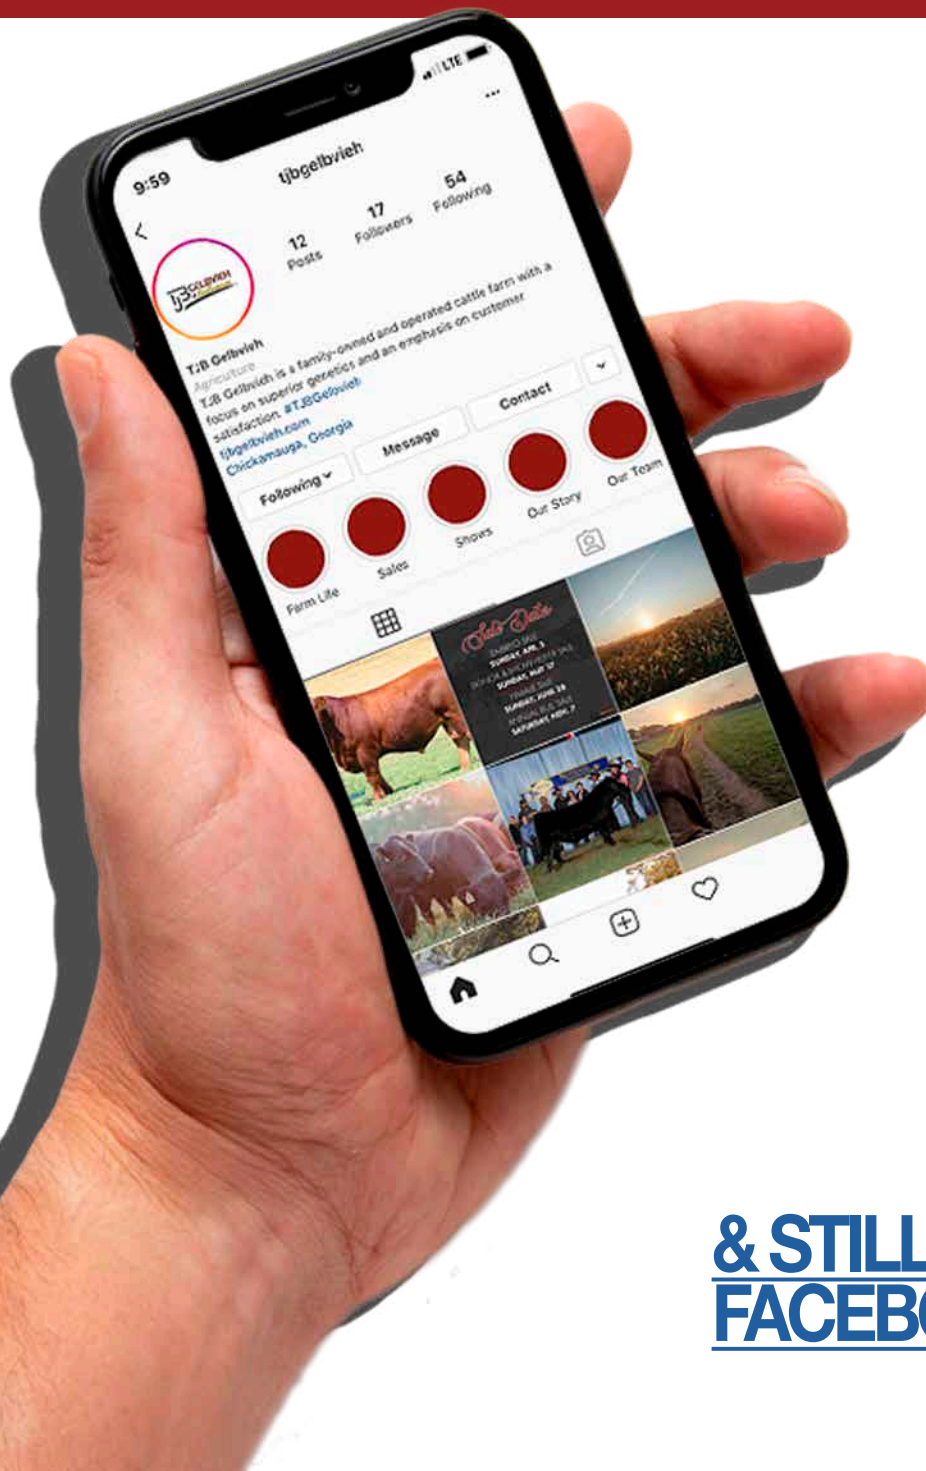

(6) Russell Edwards, *Farm Crew* | Russell first worked at our veterinary clinic thirty years ago. Now, he is responsible for hay production and farm maintenance.
